AMP Call Tracker
Business Requirements Document (BRD)

1. Objective

To develop a simple, user-friendly Call Tracker for AMP to manage calling activities across multiple projects, monitor user performance, track interested contacts, and ensure timely follow-ups.

Main Goal: Users should be able to update a call in a few clicks, with minimum manual data entry.

2. User Roles

A. Admin

- Create and manage multiple AMP projects.
- Upload and manage contact databases.
- Assign and reassign contacts to users and projects. (Optional)
- Set daily / weekly calling targets for users.
- View all calling records and dashboards.
- Monitor user-wise and project-wise performance.
- Track pending and overdue follow-ups.
- Export reports to Excel.

B. User

- View assigned contacts only. (Optional)
- Record call outcomes quickly.
- Add short discussion notes.
- Schedule follow-ups.
- View personal dashboard, call history, and pending follow-ups.

3. Call Update Pop-up

When the user taps Call on a contact, the phone dialer opens. When the user returns to the app, the Log Call pop-up opens automatically. The user fills only 3–5 fields; everything else is filled by the system. The user should not have to fill in unnecessary details after every call.

A. Auto-filled by the System (view only)

Field	Source
Contact Name	Contact database
Mobile Number	Contact database
Project	Project the contact is assigned in
Category and City	Contact database
Caller Name	Logged-in user
Call Date and Time	System clock
Call Duration	Call timer (IT to confirm for SIM calls)
Attempt No.	Count of previous calls to this contact in this project
Last Call Date and Status	Previous call record
Last Note	Previous call record
Pending Follow-up (if any)	Follow-up records

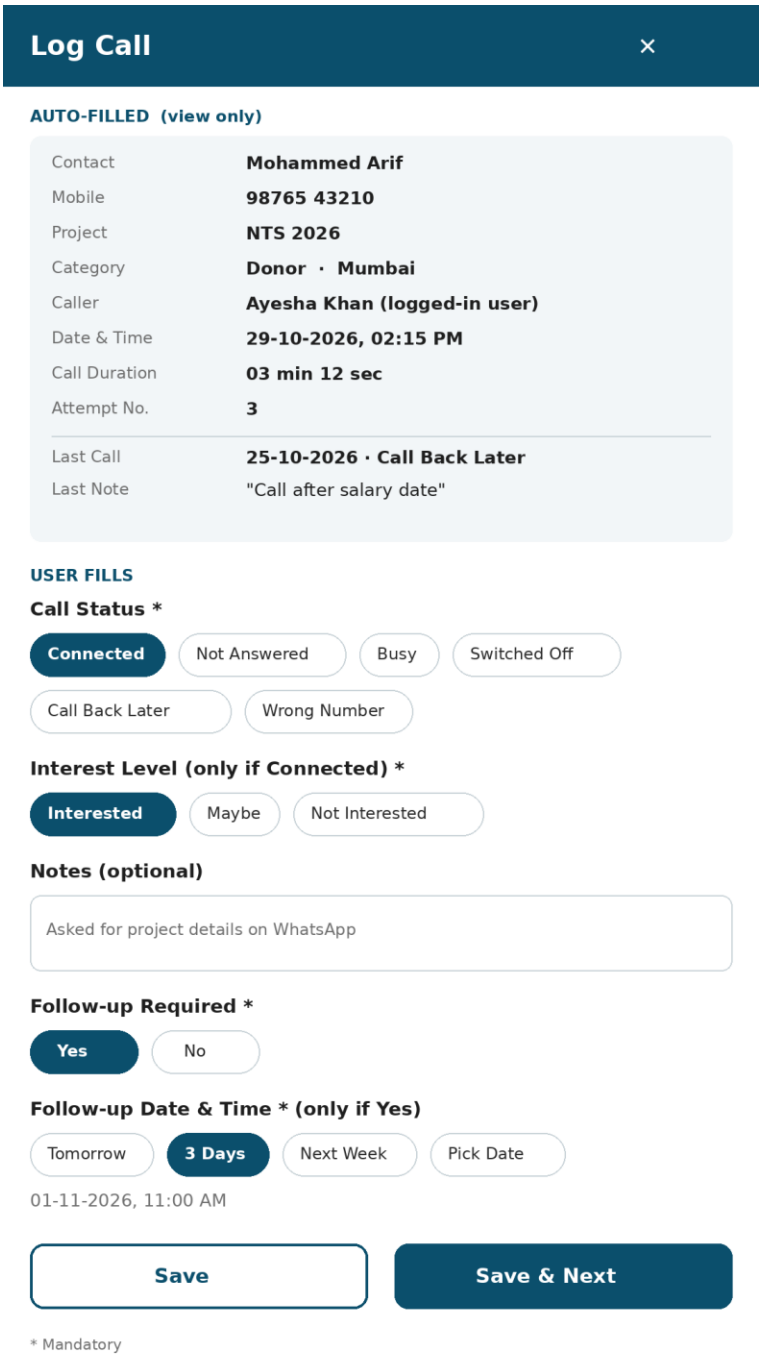

B. Filled by the User (quick selection)

Field	Options	Mandatory
Call Status	Connected / Not Answered / Busy / Switched Off / Call Back Later / Wrong Number	Yes
Interest Level	Interested / Maybe / Not Interested	Only if Connected
Notes	Short text	No
Follow-up Required	Yes / No	Yes
Follow-up Date and Time	Tomorrow / 3 Days / Next Week / Pick Date	Only if Yes

C. Buttons

- **Save** – saves the call and closes the pop-up.
- **Save & Next** – saves the call and opens the next contact.

D. Pop-up Screen (sample)

4. Data Fields

A. Contact

Field	Mandatory	Notes
Name	Yes	
Mobile Number	Yes	Unique – used to find duplicates
Alternate Mobile	No	
Email	Yes	
City	Yes	
State	Yes	
Pin Code	Yes	
Category	Yes	Donor / Beneficiary / Student / Volunteer / Other
Project(s)	Yes	One contact can be in multiple projects
Assigned User	Yes	Set by Admin

B. Project

Field	Mandatory	Notes
Project Name	Yes	
Description	No	
Start / End Date	No	
Status	Yes	Active / Closed
Assigned Users	Yes	

C. User

Field	Mandatory	Notes
Name	Yes	
Mobile / Email	Yes	Used for login
Role	Yes	Admin / User
Status	Yes	Active / Inactive
Daily / Weekly Target	No	Set by Admin

5. Dashboard

A. User Dashboard

- Total Calls Made
- Connected Calls
- Interested Contacts
- Not Interested Contacts
- Follow-ups Due Today
- Overdue Follow-ups

- Target vs Achievement

B. Admin Dashboard

- Total Calls Made by the Team
- Total Connected Calls
- Total Interested Contacts
- Project-wise Calling Performance
- User-wise Calling Performance
- Pending and Overdue Follow-ups
- Target vs Achievement by User

Filters: Project, User, and Date Range.

6. Follow-ups

- Users should see and get the reminder to their upcoming and overdue follow-ups.
- Follow-up date is mandatory only when follow-up is marked Yes.
- Pending and overdue follow-ups are highlighted (Overdue = Red, Today = Yellow).
- Follow-ups can be marked done or rescheduled.

7. Contact and Call History

- Previous call notes and history should be visible when calling the same person again.
- Each contact should have a complete history of previous calls and notes.
- Multiple calls to the same contact are recorded separately.
- The same contact can be linked to multiple AMP projects.
- Duplicate contacts are identified using the mobile number.
- When a contact is reassigned, its history and follow-ups move to the new user.

8. Automatic Data Capture

The following details should be captured automatically wherever possible:

- Call date and time
- Call duration
- Logged-in user's name
- Contact details and full database details from the existing database

Technical Note: Automatic call duration depends on the calling method. The IT team should confirm feasibility for calls made through regular mobile SIMs.

9. Reports

Admin should be able to view and export to Excel:

- Date-wise calling activity
- Project-wise calling performance
- User-wise calling performance
- Interested and not interested contacts
- Pending and overdue follow-ups

10. General Requirements

- Simple and mobile-friendly interface.
- Minimum clicks and manual data entry.
- Fast contact search by name or mobile number.
- Access based on Admin and User roles.
- Data organised project-wise.
- Reports exportable to Excel.
- Secure login and regular data backup.
